【 学习流程：第一遍请先看原文自己精读，第二遍对照着本精读文档进行理解。文章标注的单词为重点单词，只提供相关注释，想要详细释义麻烦同学查一下词典哦！另外文章底色为灰色的句子为今天的翻译作业，今日文档中的句子分析模块会提供答案，同学们请先思考再看句子分析～】

【Para.1】

AI technology that listens to and **transcribes** patients' **consultations** with doctors can put them at risk by getting the names of drugs and illnesses wrong, an NHS **watchdog** has warned.

- **transcribe v.** /træn'skraɪb/ 转录；把语音转写成文字；抄写 【考研大纲词汇】

SYN: copy, record

Researchers transcribe interview recordings into texts for qualitative analysis. 研究人员将访谈录音转写成文本，用于定性分析。

- **consultation n.** /ˌkɒnsəl'teɪʃn/ 咨询；问诊；磋商 【考研大纲词汇】

SYN: discussion, negotiation

Before making major decisions, adequate consultation with relevant stakeholders is essential. 作出重大决策之前，与相关利益方充分磋商十分必要。

- **watchdog n.** /ˌkɒnsɪˈteɪŋ/ 咨询；问诊；磋商 【考研大纲词汇】

SYN: discussion, negotiation

Before making major decisions, adequate consultation with relevant stakeholders is essential. 作出重大决策之前，与相关利益方充分磋商十分必要。

英国国民保健制度（NHS）监察机构发出警告：用于收听并转录医患问诊对话的人工智能技术，可能会错误识别药物名称与病症，使患者面临风险。

【Para.2】

In one case a woman was shocked when the AI **scribe**'s summary of her conversation wrongly said she had **demyelination** – serious nerve damage that can lead to multiple **sclerosis**. It was only when the patient, an NHS health professional, queried the AI tool's record of the result of her MRI scan that the hospital corrected it to what it should have been – “null demyelination”. “This was eventually corrected but it was a very **traumatising** experience to be given an incorrect diagnosis because of AI and then be told it's a **typo**,” said the woman, who asked not to be named.

- **scribe n.** /skraɪb/ 抄写员；记录助手

SYN: recorder

In ancient times, the scribe was responsible for

copying important documents manually. 在古代，抄写员负责手工誊写重要文书。

- **demyelination n.** /,diː,maɪələɪ'neɪʃn/ 脱髓鞘（病变）

Demyelination is a kind of pathological change related to the human nervous system. 脱髓鞘是一种和人体神经系统相关的病理改变。

- **sclerosis n.** /sklə'rəʊsɪs/ 硬化症；硬化

Multiple sclerosis is a chronic disease that damages the human nervous system. 多发性硬化症是一种损伤人体神经系统的慢性病。

- **traumatising adj.** /'trɔːmətaɪzɪŋ/ 造成心理创伤的

SYN: distressing

Witnessing violent incidents can be a deeply traumatising experience for teenagers. 目睹暴力事件对于青少年而言会是一段造成严重心理创伤的经历。

- **typo n.** /'taɪpəʊ/ 打字错误；录入笔误

SYN: misprint

Careful proofreading can effectively avoid typos in academic papers. 仔细校对可以有效避免学术论文当中的录入笔误。

有这样一则案例：一名女性看到人工智能记录助手对其问

诊对话的摘要震惊不已，摘要错误地显示她患有脱髓鞘病变——一种可诱发多发性硬化症的严重神经损伤。该患者本身是英国国民保健制度（NHS）的医护人员，正是由于她对人工智能工具记录的核磁共振扫描结果提出质疑，医院才将记录更正为正确表述：无脱髓鞘改变。这位要求匿名的女性表示：“虽然错误最终得到纠正，但因人工智能给出错误诊断，之后又被告知只是录入笔误，这段经历给我造成了极大的心理创伤。”

【Para.3】

Healthwatch England has highlighted the case and other mistakes by AI scribes to show that the technology, which the NHS is introducing, is a potential threat to patients' safety. Unless detected, errors could end up in patients' medical records and affect their care, it said.

英国健康监督局强调了该案例以及人工智能问诊记录助手出现的其他失误，以此警示：英国国民保健制度（NHS）正在推行的这项技术，会对患者安全构成潜在威胁。该局表示，倘若这些错误未被发现，就会留存到患者病历当中，进而影响诊疗工作。

【Para.4】

In another case an AI scribe confused the drug the GP had **prescribed** with a different one of a similar name – a **blunder** which, again, the patient,

not the doctor, identified.

- **prescribe v.** /prɪ'skraɪb/ 开（药方）；规定，指定 【考研英语大纲词汇】

SYN: stipulate

The rules prescribe that all participants must abide by the unified competition standards. 规则规定所有参赛者都必须遵守统一的竞赛标准。

- **blunder n.** /'blʌndə(r)/ 重大失误，荒唐错误 【考研英语大纲词汇】

SYN: mistake, fault

A strategic blunder may bring irreversible losses to the development of an enterprise. 一次战略上的重大失误，可能会给企业发展带来不可挽回的损失。

另有一起案例：人工智能问诊记录助手把全科医生开具的药物，错识别成另一种名称相近的药品。这一重大失误依旧是由患者本人发现，而非接诊医生。

【Para.5】

On another occasion an AI-generated summary letter did not say that the hospital consultant had told the patient to seek a repeat prescription from their GP for their **migraine**, which could have left them unable to get their medication.

- **migraine n.** /'mi:greɪn/ 偏头痛

SYN: headache

Long-term mental stress and lack of sleep may trigger frequent migraine. 长期精神压力与睡眠不足可能诱发频繁的偏头痛。

还有一例：人工智能生成的摘要信函，未记录医院专科医生曾叮嘱患者，要找全科医生续开偏头痛药物处方。该疏漏本有可能导致患者无法拿到所需药物。

【Para.6】

Healthwatch, the **statutory** NHS patient champion, has heard “multiple stories from patients who have noticed these errors when a health professional hasn’t”, it said. “These inaccuracies may **persist** in records if the patient doesn’t catch them.”

- **statutory adj.** /'stætjətəri/ 法定的，依照法律规定的

SYN: legal, official

Citizens enjoy statutory rights and shall also perform corresponding legal obligations. 公民享有法定权利，同时也应当履行相应的法律义务。

- **persist v.** /pə'sɪst/ 持续存在；执意，坚持 【考研大纲词汇】

SYN: continue, endure

If poverty persists in some regions, more targeted support policies should be carried out. 倘若部分地区贫困问题持续存在，就应当推行更有针对性的扶持政策。

健康监督局是英国法定的 NHS 患者权益机构，该机构表示：“已有多名患者反映，医护人员未能发现 AI 笔录错误，反而是患者本人察觉到了问题。倘若患者没有发现，错误信息就会一直留存于病历之中。”

【Para.7】

The government's 10-year health plan for the NHS in England expects AI scribes to “**liberate** staff from their current burden of **bureaucracy** and administration, freeing up time to care and to focus on the patient”. It is central to the planned “big shift” from the NHS being **analogue** to a digital-based service.

- **liberate** v. /'lɪbəreɪt/ 解放；使摆脱束缚 【考研大纲词汇】

SYN: free, release

Advanced automated equipment can liberate workers from heavy manual labor. 先进自动化设备能够将工人从繁重的体力劳动中解放出来。

- **bureaucracy** n. /bjʊə'roʊkrəsi/ 官僚体系；官僚作风；行政文书事务 【考研大纲词汇】

SYN: red-tape

Excessive bureaucracy will reduce the operating efficiency of public institutions. 过度的官僚作风会降低公共机构的运行效率。

- **analogue** n. /'ænələg/ 模拟事物；对应物 【考研大纲词汇】

SYN: counterpart

Many traditional analogue devices are gradually replaced by digital intelligent products. 许多传统模拟设备正逐步被数字化智能产品取代。

英国政府针对英格兰地区国民保健制度（NHS）出台的十年医疗规划提出，人工智能问诊笔录工具有望“把医护人员从当下繁重的行政事务中解放出来，腾出更多时间开展医疗照护、专注服务患者”。NHS 旨在实现从传统模式向数字化服务的重大转型，而 AI 记录助手正是这场转型的核心。

【Para.8】

Healthwatch said: “Healthcare has never been error-free. But our findings show the urgent need for clarity over how patients can report and get corrected any mistakes made by AI scribing tools or the professionals

that use them.”

英国健康监督局表示：“医疗行业从来都无法做到零差错。但我们的调查结果表明，当下亟需明确流程，让患者知道如何上报由 AI 记录助手或其使用者医务人员造成的错误，并对这些错误加以纠正。”

【Para.9】

Healthwatch added that it is “worrying” that the Medicines and Healthcare products Regulatory Agency has decided not to classify AI scribes as medical devices, which means there will be no England-wide oversight to ensure they are safe to use and effective. GPs and hospital doctors in England are already using 27 different AI scribes.

英国健康监督局还称，药品与医疗保健产品监管局决定不将人工智能问诊记录助手划归为医疗器械，这一情况“令人担忧”。这意味着英格兰地区不会建立统一的机制来保障这类工具使用安全且有效。目前英格兰的全科医生与医院医师已经在使用 27 种不同的 AI 问诊记录助手。

【Para.10】

Ministers have been warned that the NHS and medics could be **sued** over mistakes made by AI.

- **sue v.** /su:/ 起诉，控告 【考研大纲词汇】

SYN: prosecute

Consumers have the right to sue enterprises for losses caused by defective products. 消费者有权就缺陷产品造成的损失起诉企业。

政府大臣已收到警告：国民保健制度以及医护人员有可能因人工智能造成的失误而遭到起诉。

【Para.11】

AI's accuracy was in the **spotlight** recently when patients in Rotherham complained to their local Healthwatch that an AI **receptionist** used by some local GP practices did not understand their Yorkshire accents.

- **spotlight n.** /'spotlaɪt/ 公众关注的焦点；聚光灯 【考研大纲词汇】

SYN: focus, highlight

The severe environmental problem has come into the spotlight amid rapid urban- economic development. 在城市经济快速发展的背景下，这一严峻环境问题已成为公众关注的焦点。

- **receptionist n.** /rɪ'sepʃənɪst/ 接待员；前台人员

SYN: clerk

The receptionist is responsible for receiving visitors and sorting daily mails in the office building. 前台接待员负责在办公楼接待访客并整理日常邮件。

人工智能的准确度近来备受关注：罗瑟勒姆地区的患者向当地健康监督局投诉，当地部分全科诊所使用的人工智能接待系统无法识别他们的约克郡口音。

【Para.12】

Dr Shier Ziser Dawood, a GP in London, last year warned in a leading medical journal that AI scribes may prove “**a double-edged sword**” for family doctors. She **recounted** how an AI scribe said she had told her patient to “continue their Prozac” even though she had not prescribed or discussed that drug with them.

- **a double-edged sword n.** /ˌdʌbl 'edʒd sɔ:d/ 双刃剑；利弊并存的事物

SYN: two-sided coin

Technological innovation is a double- edged sword: it boosts productivity while bringing new social risks. 技术创新是一把双刃剑，它提升生产力的同时也带来新的社会风险。

● **recount v.** /rɪˈkaʊnt/ 叙述，讲述（经历、事件） 【考研大纲词汇】

SYN: narrate, describe

The old man likes to recount his youthful struggles to the younger generation. 这位老人喜欢向晚辈讲述自己年轻时艰苦奋斗的经历。

伦敦全科医生希尔·齐泽·达乌德博士去年在一本权威医学期刊中警告：人工智能问诊记录助手对家庭医生而言或许是一把“双刃剑”。她讲述了一则经历：AI 笔录系统记录显示，她曾告知患者“继续服用百忧解”，但实际上她既没有给该患者开具这款药物，也从未与其讨论过此药。

【Para.13】

She warned that the need for doctors to review all transcripts in order to check for errors meant that AI tools are not yet proving time-saving.

她警示道，医生必须审阅全部转录文稿以核查错误，这意味着人工智能工具目前尚未证明能够节省时间。

【Para.14】

Dr Charlotte Blease, an expert in AI use in healthcare at Uppsala university in Sweden, said “AI can and does make mistakes”, but added: “The fact is, doctors can and do make mistakes without AI. And it is

certainly possible the error rate is worse.”

瑞典乌普萨拉大学医疗人工智能领域专家夏洛特·布利斯博士表示：“人工智能会犯错，也确实犯过错。”但她补充道：“事实是，即便没有人工智能，医生同样也会出错。当然，AI工具的出错率完全有可能更高。”

➤ 今日翻译作业

(Para. 4) In another case an AI scribe confused the drug the GP had prescribed with a different one of a similar name – a blunder which, again, the patient, not the doctor, identified.

（下一页提供句子分析）

➤ 今日句子分析

Para. 4

In another case an AI scribe confused the drug the GP had prescribed with a different one of a similar name – a blunder which, again, the patient, not the doctor, identified.

另有一起案例：人工智能问诊记录助手把全科医生开具的药物，错识别成另一种名称相近的药品。这一重大失误依旧是由患者本人发现，而非接诊医生。

主句

In another case	an AI scribe	confused	the drug
状语	主语	谓语	宾语 1

定语从句（修饰 drug）

the GP had prescribed	with a different one of a similar
	宾语 2

定语从句（修饰 blunder）

name – a blunder	which, again, the patient, not the doctor,
同位语	
identified.	

句子分析：

(1) 主句主干

状语：In another case, 介词短语作句子状语，译为“另有一起案例”。

主语：an AI scribe; scribe 此处指问诊记录助手。

谓语：confused; 固定搭配 **confuse A with B**，意为“把 A 误认/混淆成 B”。

宾语 1：the drug; 后面嵌套省略关系代词 that 的定语从句修饰 the drug。

定语从句（修饰 the drug）：the GP had prescribed; GP=general practitioner 全科医生；had prescribed 为过去完成时，表示“（医生）此前开具（处方）”。

宾语 2：a different one of a similar name; one 指代前面的 drug; of a similar name 介词短语作后置定语，修饰 one，意为“名称相近的（药物）”。

(2) 破折号后同位语+定语从句

a blunder 作主句整件事件的同位语，对前面整件搞错药物的事件进行概括，blunder 指重大失误。

定语从句：which, again, the patient, not the doctor, identified。which 指代先行词 a blunder，在从句中作 identify 的宾语；again 插入副词，表“再次、依旧”；从句主语：the patient, not the doctor 插入对比成分，强调是患者而非医生；从句谓语 identified，意为“发现，识别出”。

(3) 翻译重难点

① confuse A with B, 固定短语, 不能直译为“使 A 和 B 困惑”, 医疗语境译为“把 A 错识别成 B”。

② one 是代词, 指代 drug, 翻译要还原为“药品”, 避免译成“一个”。

③ 定语从句 which...identified 是倒装结构, 正常语序为 the patient, not the doctor, identified the blunder; 英文把关系代词 which 前置, 中文要调整语序, 改成“这一重大失误依旧是由患者本人发现, 而非接诊医生”。

④ not the doctor 为插入对比成分, 中文处理为并列对比, 不要生硬嵌入句子中间。

整句翻译为“另有一起案例: 人工智能问诊记录助手把全科医生开具的药物, 错识别成另一种名称相近的药品。这一重大失误依旧是由患者本人发现, 而非接诊医生。”

➤ 写作积累

1. (Para. 7) The government' s 10-year health plan for the NHS in England expects AI scribes to **“liberate staff from their current burden of bureaucracy and administration, freeing up time to care and to focus on the patient”** . It **is central to** the planned “big shift” from the NHS **being analogue to a digital-based service**.

这两句话逻辑推进清晰：先引用政府十年医疗规划，交代外界对 AI 笔录工具的现实期待，再点明该技术在整個医疗体系改革里的战略地位，适合科技类、社会改革类考研英语作文，用来写技术解放人力、行业数字化转型。第一句中 expect sth. to do 引出技术的预期作用，**liberate sb. from sth.**点明技术减负，紧接着 freeing up... 用现在分词作结果状语，顺理带出减负之后带来的利好。核心搭配 liberate sb. from sth.表示“把某人从某种负担当中解脱出来”，burden of bureaucracy and administration 这里的 bureaucracy 不取贬义的官僚主义，侧重公共机构繁琐的行政文书事务，写教育、职场、公共服务话题都能迁移。例句如：Modern educational tools liberate teachers from the burden of trivial paperwork, freeing up time to interact with and guide students.（现代教育工具把教师从琐碎文书负担中解放出来，腾出时间与学生交流、给予学生引导）。**free up time to do sth.**表示腾出时间做更有价值的事，两个 to do 并列体现目标，分词作结果状语，体现前面“解

放人力”自然而然带来的结果，避免作文里频繁用 so、thus 生硬连接因果。

第二句 It is central to the planned “big shift” from the NHS being analogue to a digital-based service 承接上一句，把 AI 工具从具体的工具价值上升到改革战略层面。It is central to... 替代 it is important to，表示“对.....至关重要”，适合分析对策、分析关键要素。big shift from...to...描述大规模转型变化，being analogue 这里 analogue 指传统非数字化的旧模式，digital-based service 即数字化服务，from A to B 把新旧两种状态做对照。例句如：Digital innovation is central to the planned big shift from traditional offline business to online-oriented commerce.（数字创新对于计划中从传统线下商业向线上导向型商业的重大转型至关重要）。

2. (Para. 8) Healthwatch said: “Healthcare has never been **error-free**. But our findings show **the urgent need for clarity over** how patients can report and get corrected any mistakes made by AI scribing tools or the professionals that use them.”

Para.8 是引语形式，先承认客观现实，再抛出调研得出的现实诉求，适合放在分析问题之后，引出解决思路。引号内部先写 Healthcare has never been error-free, **error-free** 形容词，意为

“零差错的、完全不出错的”，用否定式 has never been error-free 承认某一领域本身就无法完全避免失误，写作时可以用来客观看待行业、技术的固有局限，避免观点过于绝对。如：Human-centered services have never been error-free, so reasonable supervision mechanisms are indispensable. (以人为核心的服务从来做不到零差错，因此合理的监管机制必不可少)。

转折之后的长句 But our findings show the urgent need for clarity over how patients can report and get corrected any mistakes made by AI scribing tools or the professionals that use them., 句子主干是 our findings show the urgent need, 后面叠加修饰成分。主干宾语 **the urgent need for clarity over sth.** 是高分表达, the urgent need for + 名词表示 “迫切需要……”, 替换普通的 we should; **clarity over sth.** 指 “把某事厘清、明确某事”, over 引出需要厘清的具体对象, 比普通的 about 书面感更强, 适合议论文提出制度、流程层面的诉求。后面嵌套 how 引导的宾语从句作 over 的宾语; 从句内部 report and get corrected any mistakes 是宾语后置, 正常语序是 report any mistakes and get them corrected, 意思是 “上报错误并使之得到纠正”; made by AI scribing tools or the professionals that use them 是两层后置修饰, 过去分词短语修饰 mistakes, that 引导定语从句限定 professionals。

这个句式的逻辑是：调研/发现表明，迫切需要把 “某群体如何

处理某类问题”的流程予以明确，很适合写科技伦理、社会治理类作文。例如：The survey findings show the urgent need for clarity over how citizens can appeal and get fixed wrong decisions made by online platforms or the staff that operate them.（调研结果表明，迫切需要明确公民该如何申诉，并纠正网络平台或是平台运营人员做出的错误判定）。

3. (Para. 9) Healthwatch added that it is “worrying” that the Medicines and Healthcare products Regulatory Agency has decided not to **classify AI scribes as medical devices**, which means there will be **no England-wide oversight to ensure they are safe to use and effective**.

Para.9 是新闻里很典型的观点评述句式，机构在原有看法基础上补充新的担忧，常用于引出监管缺失带来的隐患。句子内部嵌套多层从句，先抛出令人担忧的事实，再用非限制性定语从句引出该事实造成的后果。

classify A as B 意为“把 A 划定/归类为 B”，是书面议论文高频短语，多用于制度、法规层面对事物进行定性归类，原文 classify AI scribes as medical devices 就是监管机构将 AI 笔录工具划定为医疗器械。在写作时可以迁移到很多话题：Authorities should classify some online violent contents as harmful information and impose strict restrictions.（有关部门应当把部分网络暴力内

容划定为有害信息，并实施严格管控）。**no England-wide oversight** 里 oversight 为名词，表示“监管、监督”，属于考研英语阅读高频词；wide 加在名词前面表示“全.....范围的”，比如 nation-wide 全国范围的，city-wide 全市范围的。no ...-wide oversight 用来表达“缺少全域层面的监管”，用来点出制度漏洞。例如：There is no nation-wide oversight to regulate the rapidly-growing short-video industry.（目前缺少全国层面的监管来规范快速发展的短视频行业）。

ensure they are safe to use and effective, ensure + (that) 从句表示“确保.....”，并列形容词 **safe to use and effective**，简洁对仗，用来描述产品、技术需要满足的两大核心标准：使用安全以及实际有效。写 AI、电子产品、公共服务类话题都可以套用。例如：Relevant rules should ensure new digital services are safe to operate and practically helpful for ordinary users.（相关法规应当确保新型数字服务运行安全，并且切实对普通用户有用）。再梳理整句的句式结构：主语+add that 宾语从句，从句内部 it 作形式主语真正主语是 that 从句，后面再接 which 引导的非限制性定语从句，说明前面整件事带来的结果。
