【Para.1】

What is AI good for? If **polls** of Americans are anything to go by, not much. A large **majority** oppose the building of artificial-intelligence data centres in their backyards. Nearly as many dislike the technology in general, fearing it may **cost** them their job or even humanity its future. **Boosters** **retort** that even before AI **turbocharges** productivity, as it promises to do, the data-centre investment boom is **fuelling** economic growth. And those benefits, the argument goes, **trickle down** to everyone, not just a **handful** of tech **plutocrats**.

- **A Tale of Two Cities** n. a historical novel published in 1859 by English author Charles Dickens, set in London and Paris before and during the French Revolution 《双城记》(由英国作家查尔斯·狄更斯所著)

Their lives—one in a rich coastal city, the other in a poor inland town—read like A Tale of Two Cities. 他们的人生——

一个在富裕的沿海城市，一个在贫穷的内陆小镇——读起来就像一部《双城记》 [文章标题戏仿了该书名把 cities 变成了 silicones]

- **Trickle-down economics** n. a term used to describe government economic policies that disproportionately favor the upper tier of the economic spectrum (wealthy individuals and large corporations). The term has been used broadly by critics of supply-side economics to refer to taxing and spending policies by governments that, intentionally or not, result in widening income inequality. These critics reject the notion that spending by this elite group would "trickle down" to those who are less fortunate and lead to economic growth that will eventually benefit the economy as a whole. 涓滴经济学（认为优先让富裕阶层和大型企业获得经济利益，最终会通过投资、就业和消费等渠道使利益向社会其他群体扩散，从而促进整体经济增长的理论） [该词汇常用于批评、讽刺或者争议语境]

Higher wages are fueling demand for better housing.
工资上涨正在推动人们对更好住房的需求。

The plutocrat used his vast fortune to gain political influence. 这位富豪利用自己的巨额财富来扩大政治影响力。

人工智能有什么用？如果美国人的民调结果能够说明问题，那么答案似乎是：没什么用。绝大多数美国人反对在自家后院建设人工智能数据中心。几乎同样多的人总体上也不喜欢这项技术，担心它会让他们丢掉工作，甚至危及人类的未来。支持者则反驳称，即使人工智能尚未像它所承诺的那样大幅提升生产率，数据中心的投资热潮也已经在推动经济增长。而且，按照这种说法，这些好处最终会惠及所有人，而不只是少数科技富豪。

【Para.2】

In America, any early effects are likely to be **diluted** by the economy's **vastness** and **variegation**. Better places to look for **hints** of trickle-down chiponomics are South Korea, the world leader in advanced memory **chips** necessary to manage machine-learning **workloads**, and Taiwan, the global **powerhouse** in all other AI **silicon**.

- **dilute v.** /daɪˈlu:t/ to make something weaker or less noticeable by spreading it over a larger area or mixing it with something 稀释；削弱 【考研大纲词汇】

The company has become a global powerhouse in electric vehicles. 这家公司已经成为全球电动汽车领域的巨头。

- **silicon n.** /'sɪlɪkən/ a chemical element widely used in the production of electronic components and computer chips
硅

Silicon is a key material in the production of computer chips. 硅是生产计算机芯片的关键材料。

在美国, 这些早期影响很可能会被其庞大的经济体量和多元化结构所稀释。若想寻找“芯片经济学”涓滴效应的蛛丝马迹, 或许更应该看看韩国和中国台湾: 韩国是全球先进存储芯片的领先者, 而这些芯片对于处理机器学习的计算负载至关重要; 中国台湾则是其他各类人工智能芯片的全球产业重镇。

【Para.3】

The AI **bonanza** is already evident in the **headline** statistics. **Swelling** exports have **lifted** annual GDP growth in South Korea to a **brisk** 4% or so and to a **blistering** 12% in Taiwan. Private consumption, which was **stagnant** a year ago, is accelerating (see chart 1). In the second quarter of this year it accounted for around a fifth of the increase in Taiwanese GDP and roughly a third of South Korea's.

- **bonanza n.** /bə'nænzə/ a situation in which there is a sudden and large amount of money, success, or opportunity 意外的巨大收益; 繁荣; 财源

The discovery of oil created a bonanza for the small town.

The company reported blistering sales growth during the holiday season. 这家公司报告称，假日期间销售额增长惊人。

- **stagnant adj.** /'stægnənt/ not growing, developing, or changing 停滞的；没有增长的 【考研大纲词汇】

Wages have remained stagnant for several years. 工资多年来一直停滞不前。 [stagnate v. 停滞；不发展]

人工智能带来的繁荣已经明显体现在一些关键经济数据中。出口持续扩张，拉动韩国年度 GDP 增速达到约 4%，而中国台湾则达到惊人的 12%。一年前还停滞不前的私人消费如今正在加速增长（见图表 1）。今年第二季度，私人消费约贡献了中国台湾 GDP 增量的五分之一，以及韩国 GDP 增量的约三分之一。

【Para.4】

The economic **windfall** is most obvious in Taiwan. TSMC, the national **champion** which manufactures nearly all of the world's AI chips, increased production from 10m standard silicon **wafers** in 2019 to 15m last year. Its capital **expenditure** rose even faster in that period, from \$15bn to \$41bn. This has helped **push up** Taiwanese real fixed capital formation by nearly 40% since late 2023.

- **windfall n.** /'windfɔ:l/ an unexpected gain or profit 意外之财

The tax cut gave consumers a small windfall. 减税给消费者带来一小笔意外之财。 [形近: windmill n. 风车]

- **champion n.** /'tʃæmpiən/ a person, team, or company that has won or is considered best 冠军, 龙头企业 【考研大纲词汇】

The firm became a national champion in aerospace. 该公司成为航空航天领域的国家冠军企业。

- **wafer n.** /'weɪfə(r)/ a thin slice of silicon used to make chips 晶圆

The factory produces silicon wafers for semiconductors. 该工厂生产半导体硅晶圆。

- **expenditure n.** /ɪk'spendɪtʃər/ the amount of money spent 支出, 开支 【考研大纲词汇】

Government expenditure on health rose sharply. 政府卫生支出大幅上升。 [expend v. 花费; 消耗]

- **push up phr. v.** /pʊʃ ʌp/ to increase something 推高, 提高
Higher fuel costs pushed up airline ticket prices. 燃料成本上升推高了机票价格。

这种经济红利在中国台湾表现得最为明显。作为当地龙头企业, 台积电生产着全球几乎全部的人工智能芯片, 其标准硅晶圆产量也从 2019 年的 1000 万片增加到去年的 1500 万片。同期, 其资本支出增长得更快, 从 150 亿美元增至 410 亿美元。这也

推动中国台湾实际固定资本形成自 2023 年末以来增长了近 40%。

【Para.5】

Resources are **pouring** into the **semiconductor** supply chain. The share of Taiwanese employees making electronic **components** or computers is nearly 11%, the highest since 2016. Pay rose first in Taiwan's electronics sector, but since 2024 rises have spread across the workforce. Average **nominal** wages are now growing at 3% a year in Taiwan, compared with a pre-pandemic trend of 1.9%. Paul Cavey of East Asia Econ, a **consultancy**, points to the "Balassa-Samuelson effect", an economic phenomenon **whereby** high productivity in an industry producing **tradable** goods **bids up** the cost of labour across the board.

- **pour v.** /pɔːr/ to flow or cause to flow quickly and in large amounts 涌入，倾注 【考研大纲词汇】

Investors poured money into the startup. 投资者向该初创企业投入大量资金。

- **semiconductor n.** /ˌsemɪkənˈdʌktər/ a material or device that conducts electricity under certain conditions; chip material 半导体

A semiconductor can conduct electricity better than an insulator but not as well as a conductor. 半导体的导电性优

于绝缘体，但不如导体。

- **component n.** /kəm'pəʊnənt/ a part of a larger whole 组件，零部件 【考研大纲词汇】

The factory makes electronic components. 该工厂生产电子元件。

- **nominal adj.** /'nɒmɪnəl/ stated but not adjusted for inflation; in name only 名义上的 【考研大纲词汇】

Nominal wages rose, but real wages fell. 名义工资上升，但实际工资下降。

- **consultancy n.** /kən'sʌltənsi/ a company that gives expert advice 咨询公司

She works for a management consultancy. 她在一家管理咨询公司工作。 [consultant n. 顾问]

- **whereby adv.** /weə'baɪ/ by which; through which 凭借，由此

They introduced a system whereby employees can work from home. 他们引入了一种制度，员工可居家办公。

- **tradable adj.** /'treɪdəbl/ able to be bought and sold 可贸易的

Oil is a widely tradable commodity. 石油是一种广泛交易的商品。

- **bid up phr. v.** /bɪd ʌp/ to raise the price by competitive

bidding 抬价, 抬高价格

Bidders drove up the price of the painting. 竞拍者抬高了这幅画的价格。

大量资源正涌入半导体供应链。中国台湾从事电子元件或计算机生产的就业人口占比接近 11%，为 2016 年以来的最高水平。中国台湾电子产业的工资率先上涨，但自 2024 年以来，涨薪趋势已扩散至整个劳动力市场。目前中国台湾平均名义工资每年增长 3%，高于疫情前 1.9% 的趋势增速。East Asia Econ 咨询公司的保罗·凯维指向了所谓的“巴拉萨—萨缪尔森效应” (Balassa-Samuelson effect)：在生产可贸易商品的行业中，高生产率会全面推高劳动力成本。

【Para.6】

Things are less **clear-cut** in South Korea. That is **chiefly** because demand for South Korean silicon increased all of a sudden, rather than gradually. Between 2023 and 2025, as prices of **notoriously cyclical** memory chips initially fell after a pandemic-era **craze** for electronics **faded**, Samsung Electronics, South Korea's biggest chipmaker, actually **trimmed** its capital expenditure. SK Hynix, Samsung's main rival, **tripled** its spending in that period, but from a relatively **piddling** \$6bn a year. The government-backed \$500bn investment plan both firms have now signed up to has yet to be reflected in their **outlays**. In the past three years or so

real fixed capital formation has risen by just 3%.

- **clear-cut adj.** /ˌkliːtˈkʌt/ easy to understand or be certain about 明确的, 清晰的

The evidence is not clear-cut. 证据并不明确。

- **chiefly adv.** /ˈtʃiːfli/ mainly; mostly 主要地

The delay was chiefly caused by bad weather. 延误主要由恶劣天气造成。

- **notoriously adv.** /nəʊˈtɔːriəsli/ in a well-known bad way 众所周知地, 臭名昭著地

The train service is notoriously unreliable. 火车服务以不可靠著称。

- **cyclical adj.** /ˈsaɪklɪkəl/ happening in regular cycles; fluctuating 周期性的

Housing is a highly cyclical industry. 房地产是高度周期性的行业。

- **craze n.** /kreɪz/ an intense but short-lived enthusiasm 狂热, 热潮

The fitness craze led to a surge in gym memberships. 健身热潮导致健身房会员激增。

- **fade v.** /feɪd/ to become less strong or disappear 消退, 减弱 【考研大纲词汇】

Public interest in the scandal faded quickly. 公众对丑闻的兴

趣很快消退。

- **trim v.** /trim/ to reduce or cut 削减 【考研大纲词汇】

The company trimmed its budget to avoid losses. 公司削减预算以避免亏损。

- **triple v.** /'tripəl/ to become three times as much 增至三倍 【考研大纲词汇】

Profits tripled in five years. 利润五年内增至三倍。

[quadruple v. 增至四倍]

- **piddling adj.** /'pidlɪŋ/ small and unimportant 微不足道的

They offered a piddling sum for the work. 他们为这项工作只给了微不足道的一笔钱。

- **outlay n.** /'aʊtleɪ/ an amount of money spent 支出, 开支

The initial outlay for equipment was high. 设备的初期支出很高。

韩国的情况则没有那么简单明了。这主要是因为对韩国芯片的需求突然激增, 而不是逐步增长。2023 年至 2025 年间, 随着疫情时期电子产品热潮消退, 具有显著周期性的存储芯片价格一度下跌, 韩国最大的芯片制造商三星电子实际上削减了资本支出。三星的主要竞争对手 SK 海力士同期的支出增至原来的三倍, 但基数相对较小, 每年仅为 60 亿美元。如今两家公司都已签署参与政府支持的 5000 亿美元投资计划, 但这一计划尚未反映在它们的实际支出中。过去大约三年间, 韩国实际固定资本形成仅

增长了 3%。

【Para.7】

Most of the past year's rise in exports has thus come not from higher **volumes**, as in Taiwan, but from much higher prices. Economy-wide export prices have risen 57% over the past year in South Korea. Immediate benefits are therefore limited to the less than 1% of South Korean workers who **toil** in the chip industry and the shareholders of the memory **duo** and their suppliers (plus, indirectly, to the businesses which **cater** to the lucky few).

- **volume n.** /'vɒlju:m/ quantity or amount of something

量, 数量 【考研大纲词汇】

The volume of exports increased last year. 去年出口量增加。

- **toil v.** /tɔɪl/ to work very hard for a long time 辛苦工作

【考研大纲词汇】

Farmers toiled in the fields all day. 农民整天在田里辛苦劳作。

- **duo n.** /'dju:əʊ/ two people or things together 一对, 双雄

The comedy duo performed to a full house. 这对喜剧搭档全场满座演出。

- **cater v.** /'keɪtər/ to provide what is needed or wanted 迎

合, 服务 【考研大纲词汇】

The hotel caters to business travelers. 这家酒店服务商务旅客。

因此, 过去一年韩国出口增长的大部分并非像中国台湾那样来自出口量增加, 而是来自价格的大幅上涨。过去一年, 韩国整体出口价格上涨了 57%。因此, 眼下能够直接享受到这些好处的, 局限于不到 1% 的芯片行业从业者, 以及存储芯片双雄及其供应商的股东 (此外, 一些为这些幸运儿提供服务的企业也会间接受益)。

【Para.8】

In nominal terms, average annual wage growth across the economy has fallen below the pre-pandemic pace of 3.5% (see chart 2). The “wealth effect”, whereby a stock-market rally makes share-owning consumers feel **flush** and spend more, is also **muted**. Although South Korea's KOSPI stock-market has more than doubled in value since 2023, a study by South Korea's central bank estimates that a dollar in equity gains translates to just one extra cent of consumer spending, compared with five cents, plus or minus, for stock-loving American **households**.

- **flush** adj. /flʌʃ/ having plenty of money; feeling rich 富裕的, 有钱的

After the bonus, he felt flush and bought a new car. 拿到奖

金后，他感觉自己很有钱，买了辆新车。

- **mute** **adj.** /mju:t/ not strong or intense; restrained 微弱的，不强烈的，沉默的 【考研大纲词汇】

The proposal received a muted response. 该提案反响平淡。

- **household** **n.** /'haus həʊld/ all the people living together in one house 家庭，住户

Many households struggle to pay rising bills. 许多家庭难以支付不断上涨的账单。

从名义值来看，韩国整体经济的年均工资增速已经低于疫情前 3.5% 的水平（见图 2）。“财富效应”也较为微弱。所谓“财富效应”，是指股市上涨让持有股票的消费者感觉更加富裕，从而增加消费。尽管韩国综合股价指数（KOSPI）自 2023 年以来已增长至原来的两倍以上，但韩国央行的一项研究估计，股票资产每增加 1 美元，只会转化为约 1 美分的额外消费；相比之下，对于热衷股票投资的美国家庭，这一比例约为 5 美分，上下略有浮动。

【Para.9】

South Korea's government is also **stingier**. Despite projections of a 50% rise in tax **revenue** in 2027, it is not planning to **shower** citizens with cash. Some 70% of the windfall will be saved, reckons Capital Economics,

a consultancy. The money will mostly be **channelled** towards **deficit** reduction and a new Future Response Fund for long-term investments.

- **stingy adj.** /'stɪndʒi/ unwilling to spend or give money 吝
嗷的，小气的

The company is stingy with employee benefits. 该公司对员
工福利很吝嗷。

- **revenue n.** /'revənju:/ income, especially from taxes or
business 收入，税收 【考研大纲词汇】

Government revenue increased after the tax reform. 税改
后政府收入增加。

- **shower v.** /'ʃaʊər/ to fall down or come out in a shower, or
to make something do this (某物) 如阵雨般落下

She shook the bottle violently and showered us with
champagne. 她用力晃动酒瓶，向我们喷洒香槟。

- **channel v.** /'tʃænəl/ to direct something into a particular
place or situation 引导；把...导入，将...引入

A lot of money has been channelled into research in that
particular field. 大笔经费投入到了那个领域的研究中。

- **deficit n.** /'defɪsɪt/ the amount by which spending
exceeds income 赤字，逆差 【考研大纲词汇】

The country is trying to reduce its budget deficit. 该国正试
图减少预算赤字。

韩国政府则显得更加吝啬。尽管预计 2027 年税收收入将增长 50%，政府并没有计划向民众大笔发放现金。咨询公司 Capital Economics 估计，这笔意外增加的税收收入中约 70% 将被留存下来。资金将主要会用于削减财政赤字，以及投入一个新的“未来应对基金”（Future Response Fund），用于长期投资。

【Para.10】

As Samsung and SK Hynix **ratchet** up their investments, production will increase. This should fuel demand for labour and eventually lift wages for everyone, as happened in Taiwan. Mr Cavey likens South Korea to Australia in 2003-11, when a **commodity** boom led to a lasting **uptick** in mining investments that eventually translated into broad economic benefits. The South Korean government's planned investments in infrastructure and education may also yield productivity gains that Taiwan's cash **handouts** would not. The effects of such policies will not be as quick. But they may prove more **durable**.

- **ratchet up phr. v.** /'rætʃɪt ʌp/ to increase gradually in stages 逐步提高，逐渐增加

The two sides continued to ratchet up pressure on each other. 双方继续逐步加大对彼此的压力。

- **commodity n.** /kə'mɒdəti/ a raw material or primary product that can be traded 大宗商品 【考研大纲词汇】

Coffee is an important commodity for the country. 咖啡是该国重要的大宗商品。

- **uptick n.** /'ʌptɪk/ a small increase or improvement 小幅上升

There was an uptick in sales after the ad campaign. 广告活动后销售额小幅上升。

- **handout n.** /'hændaʊt/ money or goods given to people in need; free gift 施舍物, 救济金

Critics called the payment a government handout. 批评者称这笔款项是政府施舍。

- **durable adj.** /'djʊərəbəl/ lasting for a long time 持久的
【考研大纲词汇】

The peace agreement proved durable. 这项和平协议被证明是持久的。

随着三星和 SK 海力士不断加大投资, 产量也将随之增加。这应该会带动劳动力需求, 并最终像中国台湾一样带动所有人的工资上涨。凯维将韩国的情况比作 2003 年至 2011 年的澳大利亚: 当时大宗商品繁荣推动采矿业投资持续小幅上升, 并最终转化为广泛的经济收益。韩国政府在基础设施和教育领域的投资还可能带来生产率提升, 而中国台湾发放现金则无法产生这种效果。此类政策的见效速度不会那么快, 但其影响可能更加持久。

chiponomics 由 **chip** 和 **economic** 这两个词合成而来。指围绕芯片产业及其经济影响形成的经济现象、产业逻辑或政策体系翻译为“**芯片经济学**”。这个词语不属于常用词汇，而是属于新闻造词，A 的一部分 + B 的一部分 → 新词

其他较为经典的新闻造词还有：

- ◆ **Brexit** n. Britain + exit → Brexit 英国脱欧

Brexit has had a significant impact on the UK's relationship with the European Union. 英国脱欧对英国与欧盟之间的关系产生了重大影响。

- ◆ **greenwashing** n. green + washing 漂绿（指“企业把自己包装得很环保”）

Some companies use greenwashing to make their products seem more environmentally friendly than they really are. 一些公司利用“漂绿”来让自己的产品看起来比实际情况更加环保。

Edutainment can make learning more engaging for children. 寓教于乐可以让儿童的学习过程更有吸引力。
